

German, Christian Gil M.

zone 2 Centro Peñablanca Cagayan | christiangerman21@gmail.com | 09158159757

OBJECTIVE

To gain practical industry experience through On-the-Job Training, applying my skills in computer engineering, embedded systems, and hardware prototyping while contributing to innovative projects and developing professional growth.

EDUCATION

Cagayan State University - Carig Campus — 2023 - Present
Bachelor of Science in Computer Engineer

Peñablanca National Highschool — 2019 - 2021
Señior Highschool - **With Honors**

PROJECTS

PIC Development Board (PIC Microcontroller, Breadboarding, PCB Design)
- Designed and implemented a custom development board using PIC microcontroller
- Programmed digital I/O functions and tested embedded applications
- Provided a platform for learning and testing microcontroller-based systems

Sea Trash Bin Monitoring System (Arduino Project)
- Developed a prototype trash bin that detects waste using ultrasonic sensors
- Programmed Arduino to monitor and display waste levels
- Designed to support coastal waste management by automating monitoring

Golden Harvest Subdivision Boarding House Finder (Web Development: HTML, CSS, JavaScript, PHP, Python, MySQL)
- Collaborated in a team to design and develop a web-based platform for boarding house management
- Implemented secure user authentication, property listing management, and advanced search filters
- Adopted Agile methodology with iterative sprints, stakeholder feedback, and continuous testing to ensure usability and reliability

Regulated DC Power Supply (5V, 12V, & Adjustable)
- Built a multi-rail power supply providing 5V, 12V, and variable voltage outputs for electronics testing.
- Performed component-level assembly and rigorous testing to ensure stable performance

- **University Information System Database**
- Developed an MS Access relational database to map and optimize student, course, and faculty data flows.
- Automated academic data processing with specialized SQL scripts

SKILLS

- *Programming*: oriented with Python and Javascript, C++,HTML
- *Embedded Systems*: Proficient in Arduino and PIC microcontroller programming
- *Electronics*:Proficient in Breadboarding, circuit prototyping, and basic troubleshooting
- *Hardware Design*: Oriented with PCB layout and design for academic projects
- Problem Solving: Able to analyze basic technical problems and assist in developing practical solutions.
- Computer Skills: Proficient in Microsoft Office (Word, PowerPoint, Excel) and basic documentation for technical reports.
